Projects

DOC APP- A Doctor Appointment Scheduling website

github.com/PriyajitMansingh/Doctor-Appointment-App [🔗](#)

- It is a website designed using react which helps the users to schedule an appointment with the doctor of the desired department.
- It provides the user the facility to schedule an appointment for a desired date with desired time slot.
- Both Doctor and Patient can get connect with each other and communicate through text.
- Tools Used: React, Node.js, MongoDB, Express.js

Personal Portfolio [github.com/Portfolio](https://github.com/PriyajitMansingh/Portfolio)

[PriyajitMansingh/Portfolio](https://github.com/PriyajitMansingh/Portfolio) [🔗](#)

- Designed a portfolio which displays my project work and do contain all the information required.
- Contains animated components showing my proficiency in front-end development.
- Tools Used: HTML, CSS, JavaScript, Node.js

AI – Chatbot

[PriyajitMansingh/Stunter-AI](https://github.com/PriyajitMansingh/Stunter-AI) [🔗](#)

- Built a UNIX-style OS with a scheduler, file system, text editor, and calculator
- *The chatbot supports Markdown formatting, so it can respond with code blocks, lists, and links for better readability*
- *The app combines advanced AI capabilities with a clean, responsive interface, offering a seamless and interactive experience for users.*
- *The application is built using the **MERN stack**—MongoDB, Express.js, React, and Node.js—to create a full-stack web experience.*
